The Value of PMA

Have you ever heard anyone say I can't beat them or the game is over now. Many times close cricket games are won and lost with one good shot that causes the opponent to give up. I know the odds of winning a game when you are 50 points and 4 numbers down are slim but not impossible. I've won many games by telling myself I refuse to lay down and let them win. Granted you may only win 10% of those games but they are the ones you will remember the longest and so will your opponent.

The purpose of this short article is to remind old and young players alike that Positive Mental Attitude or "PMA" for short will help you win more games. Darts is a funny game, you win games you shouldn't win and lose games you shouldn't lose. By trying to forget the last loss and focusing on the current game and by not ever admitting you are defeated until the opponent shakes your hand you may be able to pick up a game or two you have lost in the past. Learn from your mistakes and have fun. See you at the ochre.

Rules for Football

Football: This is a fun game for two teams of 1-4 players. The rules are very simple, but the game is quite challenging.

The Object: The object is to be the first to score a predetermined number in a manner similar to American football.

The Scoring: One player from each team throws one dart at a bullseye, closest to the bullseye goes first. The team names are written on the board in order and a 0 placed next to each name to indicate the current score. The teams pick a side of the board to be their "goal line", either 11 or 6.

The Play: Each team has four "downs" to try to move the ball across the board and into their opponents goal. Each down consists of three darts thrown and players on the team alternate for equal opportunity to play.

The playable area of the board is the Double-11, Triple-11, Small 11, Bullseye, Double-Bullseye, Bullseye, Small-6, Triple-6, Large 6 and Double-6. One team's goal line is the Double-11 and the other team's goal line is the Double-6. The Double-Bullseye is the "50 yard line".

The first team starts at their own goal line, for example Double-6. They try to hit one dart in each number in order across the board. The team plays all 4 of its downs (a total of 12 darts) in a row to try to move the ball as far across the field as possible. At the end of the 4 downs, the other team "takes possession of the ball" where the original team left it and has 4 downs to try to move it back across the goal line.

If a team scores a goal (sequentially hitting all the target numbers across the board ending in the other team's goal line {the double or 11}) that team earns 6 points and has an opportunity to throw for an extra point. An extra point is scored by throwing one dart in the 20. Where the dart lands in the twenty does not matter, it always scores as only one point.

After a goal is scored, the other team takes possession of the ball at it's own goal regardless of how many darts or downs and the scoring team had left.

Strategy: Take your time and concentrate on the bullseyes. They are hard to hit, but once you get across, it's all down hill and the other team has to get the ball back across.
